

Mexico City on September 25th, 2023

ANNOUNCEMENT TO PARTICIPANTS

FIRST ELECTRONIC ISSUANCE OF AN EQUITY SECURITY.

On September 15th of the current year, the issuer informed through a rights notice the **exchange of more than 836 physical to electronic** Series "1" and "C-1" shares that are currently in the custody of Indeval.

This is how "El Puerto de Liverpool, S.A.B. de C.V." (LIVEPOL), one of the companies that is currently in the custody of Indeval, will be able to exchange its shares. (LIVEPOL), one of the largest full-line department store companies in the country and part of the BMV Group's family of issuers, is positioned as the **first issuer** to be part of the migration to Electronic Capital Securities.

The issuance of this security is under safekeeping in an **electronic vault** which complies with security requirements and with the objective of reducing or eliminating the loss of information in accordance with the general characteristics of computer security contained in the international standard issued by the *International Standard Organization* under the reference **ISO 27002:2013**.

In this way, along with Liverpool, we are marking a milestone in the history of issuance, as we pave the way for the migration of electronic securities. With the change to the new deposited electronic title, the process of rights payments is simplified, supporting the **development of the financial market in Mexico**.

sincerely

Operation and Settlement Management
